I don't know if this was developed by industry or their counsel.....or our ORC. I can ask.

Do you know where this paper came from?

I've seen it before. This relates to SSM for PM emissions at Texas coal-fired EGUs. This was related to the issue in Pirkey, but it has been raised on numerous coal fired power plants with cold side ESPs in Texas. We have a broader SIP (and related permits) programmatic petition on this. We've had higher level input in OAR and we are working with TCEQ on this....including some industry participation who wants this issue dealt with.

Have either of you seen this before? I don't think we put it together, at least not that I can find. Mike asked me if it came from us.

Cheryl,
This is the paper you requested in your vm. I don't know its origin, but speculation over here is that it is from a non-governmental entity. We're told that Clint seeks our views by midweek.

Mike
